

INTEGRATIVE BIOLOGY SEMINAR

Spring 2021
Tuesday, Noon
SLB 121 & ZOOM

Date	Speaker	Title
19 Jan	No Seminar	
26 Jan	No Seminar	
02 Feb	Daniel Goldberg (Capparella Lab)	A rallid ballad: communal signaling and acoustic adaptations in rails and their relatives
09 Feb	Bert Foquet (Post-doc Sadd/Sakaluk Labs)	The evolution of density-dependent phase polyphenism in locusts and related grasshoppers
16 Feb	Elliot Lusk (Casto Lab)	Creepy crawly compensation: examining the costs of ectoparasite-induced compensatory growth in late-stage nestlings
23 Feb	Pooja Kadaba Ranganath (N. Mortimer Lab)	Role of a long non-coding RNA in <i>Drosophila melanogaster</i> immunity
02 Mar	Madison Steines & Liana Haas	Intraspecific color variation in a ubiquitous beetle
	Evan Talbott-Swain & Brienne Rimmele (Dugas Lab)	Tadpole development in a species pair with divergent life-histories
09 Mar	No Seminar	
16 Mar	Paige Farchmin (Sakaluk/Thompson Lab)	Effects of increased nestbox temperature and vitamin E supplements on house wren nestling development
23 Mar	Jack McKermitt (Sadd/Sakaluk Labs)	Effects of sexual conflict on calling effort in decorated crickets (<i>Gryllodes sigillatus</i>)
30 Mar	Madi Rittinger (Sakaluk/Thompson Lab)	Sex-specific effects of hatching order on baseline corticosterone of nestling house wrens are unrelated to hatching synchrony
06 Apr	Tim Martin (Borowicz Lab)	In defense of plants: salicylic acid in a host-parasite-pathogen system
13 Apr	Alex Muranus (Engelke Lab)	Cellular regulation of the heterotrimeric kinesin-2 motor protein
20 Apr	Shana Border (Dugas Lab)	The function and evolution of nestling mouth coloration
27 Apr	Jaclyn Everly (Juliano Lab)	Population and community-level impacts of groundwater larviciding
