

Cellular and Molecular Biology (CMB) Seminar Series

Wednesdays, Noon

All presentations will be on Zoom unless otherwise notified.

Date	Speaker	Talk Title
March 11	Spring Break	No Seminar
March 18	Extended Spring Break	No Seminar
March 25	Dalton Williams (Sedbrook lab)	Elucidating the roles of the <i>HIGH ALOPHATIC GLUCOSINOLATE (HAG)</i> genes in glucosinolate production in pennycress (<i>Thlaspi arvense</i>)
April 1	Dana Niswonger (Vidal-Gadea Vrailas-Mortimer labs)	The role of different dystrophin isoforms on hypertrophy-induced muscle cell adaptations in <i>Drosophila melanogaster</i> larvae
April 8	Natalie Burrell (Hammond lab)	Investigating heterologous expression of a <i>cas9</i> transgene in <i>Neurospora crassa</i>
April 15	Sadia Sultana (Dahl lab)	Hypochlorous acid specific response mechanisms of Uropathogenic <i>E. coli</i>
April 22	Tim Martin (Borowicz lab)	Defensive interactions between the parasitic plant <i>Cuscuta pentagona</i> and its host
April 29	Julia Martin (Vrailas-Mortimer lab)	Understanding the role of GARS in Charcot-Marie-Tooth disease
May 6th	Liza Gautam (Sedbrook lab)	Engineering larger seed size in the oilseed plant pennycress (<i>Thlaspi arvense</i>)
