

# Molecular and Cellular Biology Seminar

Wednesdays, Noon, SLB 121

## Fall 2026 Schedule

| Date    | Speaker                              | Title                                                                                                            |
|---------|--------------------------------------|------------------------------------------------------------------------------------------------------------------|
| Aug 19  |                                      | No seminar                                                                                                       |
| Aug 26  |                                      | No seminar                                                                                                       |
| Sept 2  | Naga Nidadavolu<br>(Vidal-Gadea Lab) | Characterization of smooth muscle pathophysiology in Duchenne Muscular Dystrophy                                 |
| Sept 9  |                                      |                                                                                                                  |
| Sept 16 |                                      |                                                                                                                  |
| Sept 23 |                                      |                                                                                                                  |
| Sept 30 |                                      |                                                                                                                  |
| Oct 7   |                                      |                                                                                                                  |
| Oct 14  |                                      |                                                                                                                  |
| Oct 21  | Tanisha Bhimwal<br>(Dahl Lab)        | TBD                                                                                                              |
| Oct 28  | Joseph Alexander *<br>(Floyd Lab)    | Holding it Together: MSHA Pili and the Architecture <i>V. cholerae</i> Biofilms                                  |
| Nov 4   | Julius Narh<br>(Dahl Lab)            | Characterization of the Role of Polyphosphate for Membrane Stress Adaptation in Gram-negative Bacteria           |
| Nov 11  |                                      |                                                                                                                  |
| Nov 18  | Shahriar Mahmud<br>(Hammond Lab)     | TBD                                                                                                              |
| Nov 25  |                                      | Thanksgiving Break                                                                                               |
| Dec 2   | Debajyoti Basu<br>(Floyd Lab)        | Risky Sustenance: Dietary LCFAs Suppress MSHA Pili to Foster <i>Vibrio cholerae</i> Environment-Host Transitions |

\* PhD proposal defense, or MS thesis defense seminar
